EDUCATION

Ph.D. Finance

University of Alberta, Canada

Committee: Lukas Roth (Chair), Efstathios Avdis, Barry Scholnick

expected

XCS224U - Natural Language Understanding

Stanford University, School of Engineering

Aug-Oct 2022

MSc. Economics

University of Rome Tor Vergata, Italy

2012-2014

BSc. International Relations

Eurasian National University, Astana, Kazakhstan

2005-2009

RESEARCH

Working Papers

- Predictive power of the language for CEO turnovers (2024)

Abstract: In this paper, we find novel evidence that the language of the CEO during the earnings calls can predict the upcoming leadership turnover. Specifically, in the meetings preceding the public announcement about the CEO transition, executives exhibit changes in business tone, stress levels, and self-attribution. The results are obtained using a state-of-the-art financial language model, FinBERT, coupled with traditional word-counting algorithms. Our findings suggest that the qualitative information in earnings calls contains signals about the CEO turnover risk incremental to the commonly used quantitative performance variables.

- (In)consistency of financial disclosures (2024, with Prof. Avdis)

Abstract: This study explores firms' disclosure strategies in the context of costly information processing. We hypothesize that managers can manipulate the disclosure processing cost to hide more negative information in the 10-K/Q filings while presenting more favorable news in the Earnings calls. To investigate the relationship between the processing cost and the informativeness of the disclosures we develop a novel methodology that allows us to estimate the similarity of the two information outlets by regressing one text on another regardless of their correspondent size and/or structure.

- Diversity premium during social uprising (2024)

Abstract: During the period of the increased public attention to racial discrimination marked by the Black Lives Matter protests, firms with at least one Black director on the board earned abnormal returns of 3.59% over 6 days. This is true only if the firm is headquartered in states with a low fraction of the Black population. My evidence aligns with the hypothesis that the market particularly rewards intentional racial diversification, which exceeds the demographic composition of the state.

TEACHING EXPERIENCE

Primary instructor

Alberta School of Business, University of Alberta

2022, 2023, 2024

- Introduction to Corporate Finance (FIN 301)

Teaching assistant

Alberta School of Business, University of Alberta

Winter 2022

- Fintech (FIN 488)

Teaching assistant

Fuqua School of Business, Duke University

Winter 2018

- Raising Capital (EMBA Residency)

Teaching assistant

Graduate School of Business, Nazarbayev University

Jul 2016-Jun 2019

- Corporate Finance (FT MBA, EMBA, MSc Finance)
- Financial Statement Analysis (FT MBA, EMBA, MSc Finance)
- Valuation (FT MBA)
- Investments (MSc Finance)
- Probability and Statistics (FT MBA, EMBA, MSc Finance)
- Data Analytics for Business (FT MBA)
- Entrepreneurial Finance (EMBA)
- Private Equity (MSc Finance)

HONORS, AWARDS, & FELLOWSHIPS

GRA Rice Award

University of Alberta

2024

Graduate Student Teaching Award

University of Alberta

2024

Financial Education Ph.D. Award in Finance

AIMCo Foundation

2023

Business PhD Scholarship

Ernst and Young Endowment

2021-2022

PhD Program Scholarship

Alberta School of Business

2019-2021, 2023

MISCELLANEOUS

- Natural Languages* – English, Russian, Italian
- Machine Languages* – PYTHON, STATA, R, SAS, MATLAB, L^AT_EX
